Red arrows indicate the intended drag-and-drop actions: one arrow points from the "MAR" section down to the "Not on table" section, and another points from the "AGEP\_RC1" section up to the "Rows" section.

On the right side, there is a "Table Preview" section with a red border. It contains a message: "Drag and drop variables between sections on the left; see results on table layout below." Below this, it shows the current table configuration: "Values in table cells: Average of Age (AGEP)" and "Universe: selected geographies: New Mexico; Marital status (MAR): Married". The table preview area is currently empty, showing only a "???" placeholder.

- Choose type of values in table cells

The page features a left-hand navigation menu with categories such as 'WHAT IS DATA.CENSUS.GOV?', 'Latest Releases', and 'Developmental Update' (which is highlighted). The main content area is titled 'Developmental Update' and dated 'NOVEMBER 04, 2021'. It includes a paragraph explaining the purpose of the page and a link to a 'Full Release Notes Document' (2.2 M). Below this, a 'Latest Updates' section is highlighted with a red box, containing a list of updates for early-November, including an improved table layout for the Population Estimates Program. The page also includes a search bar at the bottom with the query 'population estimates all states' and a 'Top' button on the right side. A feedback widget is visible in the bottom right corner.

### Latest Updates

In early-November, we released the following updates to the site:

- Improved layout for tables from the Population Estimates Program. With this update, you will now see tables automatically displayed with the recommended pivot. This new feature allows certain data values to become column headers instead of repeated rows within the table. For Population Estimates Program tables, the default display now provides one row for each of your geographies, and it will contain the geography name and population estimates over time.

## Guidance for Data Users

Data.census.gov is the new platform to access data and digital content from the U.S. Census Bureau. The vision for data dissemination through data.census.gov is to improve the customer experience by making data available from a centralized place so that data users spend less time searching for data and more time using it.

The vision for data.census.gov stems from overwhelming feedback that the U.S. Census Bureau has received to simplify the way customers get data. The Bureau continues to work on the customer experience so that it is not only easy for data users to know Census Bureau jargon or perform a complicated task, but also to find the data that they need. In the past, prior to the inception of data.census.gov, the Census Bureau collected information, processed edits, reviewed and disseminated it through multiple websites and applications. Data users now know how to navigate these sites and applications in order to receive the data they need.
